

Wotter Dispensary

Wotter offers dispensary services for both acute and regular medications for patients living within the catchment area or that live more than mile away from a pharmacy.

Acute & routine medications requested will be dispensed and ready for patient collection of the next opening day after 12.30pm, for example if requested Monday, medications will be ready to collect after 12.30 on Thursday.

Wotter Dispensary also holds a wide range of antibiotics and urgent medications at all times.

Managed Repeat Medication

Wotter Dispensary offers a "Managed Repeat Medication" service for patients who struggle to manage their medications and often find themselves running out of medication. Patients do not need to request their medications each month unless there are any acute medications required. They can collect 28 days worth of their regular medications every 4th Thursday and will be given a list of dates for collections.

Wotter Dispensary also offers Blister packs for patients who find it very difficult to take the correct medications at the correct time of day, or struggle to take their medications due to mobility issues, or for patients who have their medications given to them by carers or district nursing team. Blister packs are issued 4 weeks at a time for collection from Wotter surgery.

If there are any special requests that need to be made with regards to additional medications due to going on holiday, this can be discussed with the Pharmacy and Reception Team to ensure that the supply of medication is continued without issue.
